WIND IN MY BACKYARD

Power with People:
Local Tools for **Just** Wind Futures

Power with People directly targets regional energy planners and citizen stakeholders across Europe, equipping them with actionable tools and inclusive governance approaches for just wind energy deployment.

15 October 2025

11:30 - 16:00

Sparks, 60 Ravenstein street, 1000 Brussels

Meet the projects

JUSTWIND4ALL

JustWind4All supports the acceleration of onshore and offshore wind energy, including emerging technologies like airborne and floating wind, through just and effective governance. We take a transdisciplinary approach that combines holistic impact assessment, energy systems modelling, and multicriteria mapping to strengthen wind energy governance and promote active energy citizenship.

WIMBY

The WIMBY project is dedicated to increasing the use of wind power by addressing challenges that threaten its deployment, such as complex regulations and controversial public perception. WIMBY transdisciplinary research addresses these by involving citizens and stakeholders, collecting their concerns and engaging them in co-creation activities to develop informed decision making tools.
